**EXPERIMENT 4 :** LIBRARY BOOK RESERVATION SYSTEM

## AIM

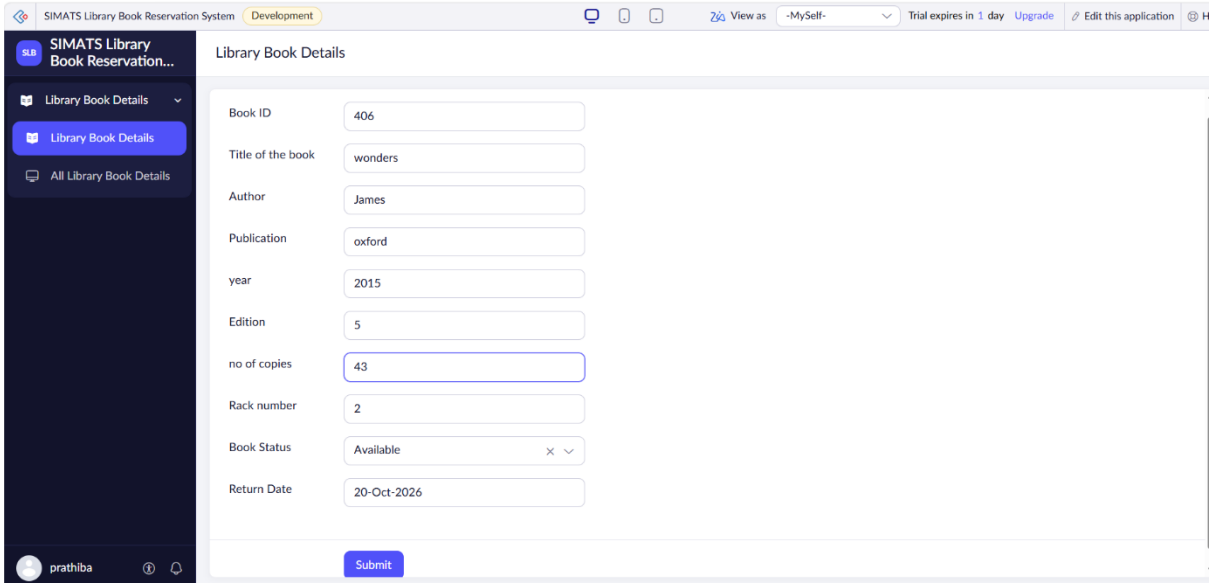

To create a simple cloud-based Library Book Reservation System for SIMATS Library using Zoho Creator to demonstrate Software as a Service (SaaS).

## PROCEDURE

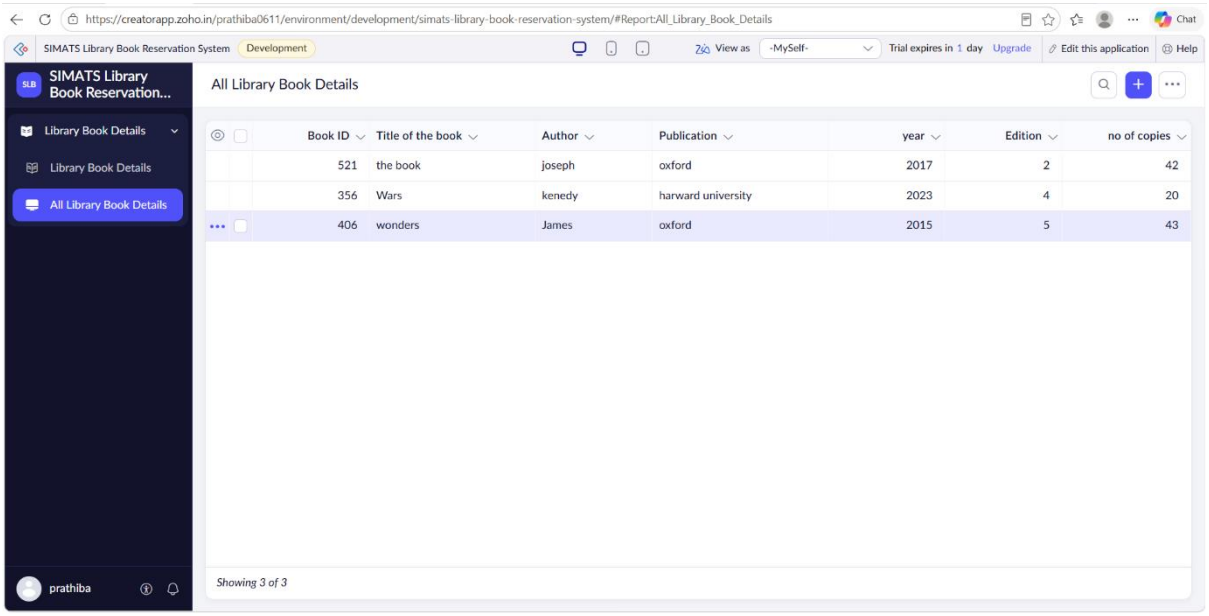

1. Open Zoho Creator and log in using a Zoho account.
2. Create a new application named **SIMATS Library Book Reservation System**.
3. Create a form named **Library Book Details**.
4. Add the required fields such as Book ID, Title of the Book, Author, Publication, Year, Edition, Number of Copies, Rack Number, Book Status, Student Name, Register Number, and Reservation Date.
5. Configure the Book Status dropdown with Available, Reserved, Taken, and Returned options.
6. Set suitable field types, such as Single Line for the book title and author, Number for the year and number of copies, and Drop Down for the book status.
7. Save the form and create a table report named **Library Book Records** to display the stored book details.
8. Enter sample book details and submit the form.
9. Verify that the book records are stored and displayed in the report.

# IMPLEMENTATION

## INPUT

## OUTPUT

## RESULT

Thus, a cloud-based Library Book Reservation System for SIMATS Library was created using Zoho Creator, demonstrating the Software as a Service (SaaS) model.
