EXPERIMENT 11 Online Supermarket Application

AIM

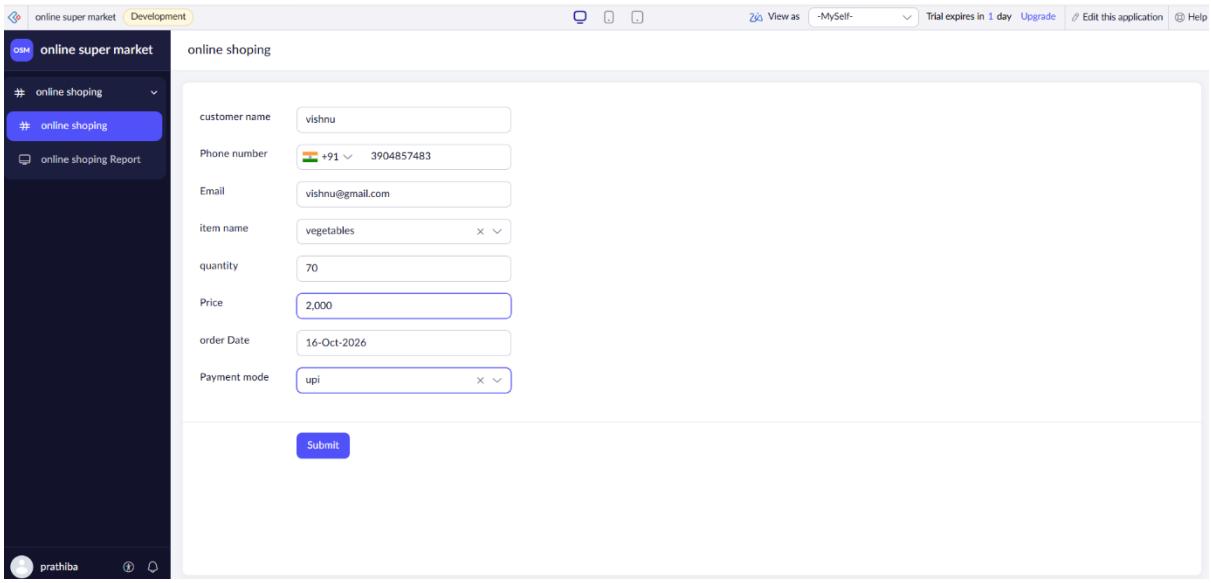

To create a simple cloud-based Online Supermarket application using Zoho Creator to maintain customer details, manage item orders, record quantities, and classify supermarket products.

PROCEDURE

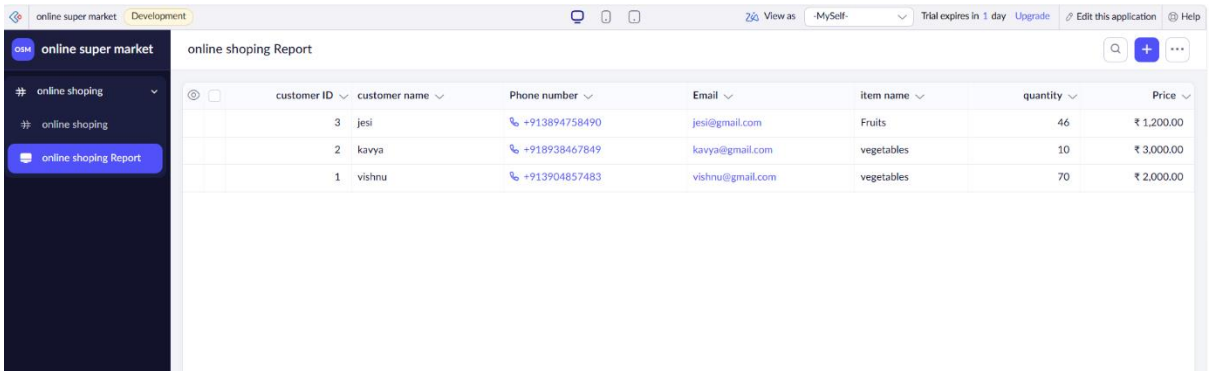

1. Open Zoho Creator and sign in to your account.
2. Create a new application named Online Supermarket System.
3. Create a form named Customer Order Form to collect customer details and order information.
4. Create a separate Item Classification Form to organize supermarket products into categories.
5. Add the necessary fields to both forms, including customer information, item names, quantities, and product categories.
6. Enter customer details and select the required supermarket items.
7. Classify items into categories such as groceries, fruits and vegetables, dairy products, beverages, and household essentials.
8. Save the submitted information in the cloud database.
9. Create reports to display customer orders, item quantities, and product classifications.
10. Test the application by entering sample customer orders and verifying the stored records.

IMPLEMENTATION

INPUT

OUTPUT

RESULT

Thus, a cloud-based Online Supermarket application was created using Zoho Creator to maintain customer details, manage item orders, and classify supermarket products through a separate form, demonstrating the Software as a Service (SaaS) model.
