EXPERIMENT 5 Mark Sheet Processing System

AIM

To create a simple cloud-based Mark Sheet Processing System using Zoho Creator to store student details, enter subject marks, and calculate the average, percentage, rank, and overall performance.

PROCEDURE

1. Open Zoho Creator and sign in.
2. Create a new application by selecting Create New Application and enter the application name as Mark Sheet Processing System.
3. Create a form named Student Mark Sheet.
4. Add the following fields to the form:

S.No.	Field Name	Field Type
1	Name of the Student	Single Line
2	Register Number	Single Line
3	Subject 1	Number
4	Subject 2	Number
5	Subject 3	Number
6	Subject 4	Number
7	Subject 5	Number
8	Total Marks	Number
9	Average	Decimal
10	Percentage	Decimal
11	Rank	Number
12	Overall Performance	Dropdown

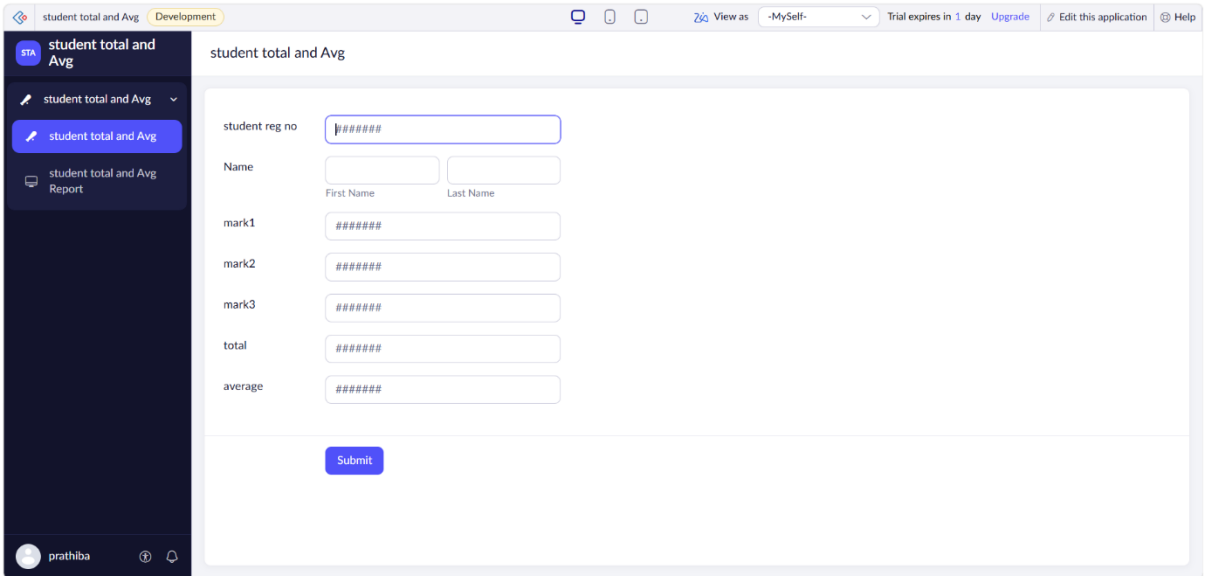

5. Configure the Overall Performance dropdown with the options: Excellent, Very Good, Good, Average, and Needs Improvement.
6. Enter the student details, register number, and marks obtained in all five subjects.
7. Calculate the total marks, average, and percentage using the entered subject marks.

- Total Marks = Sum of all five subject marks
- Average = Total Marks ÷ 5
- Percentage = (Total Marks ÷ 500) × 100

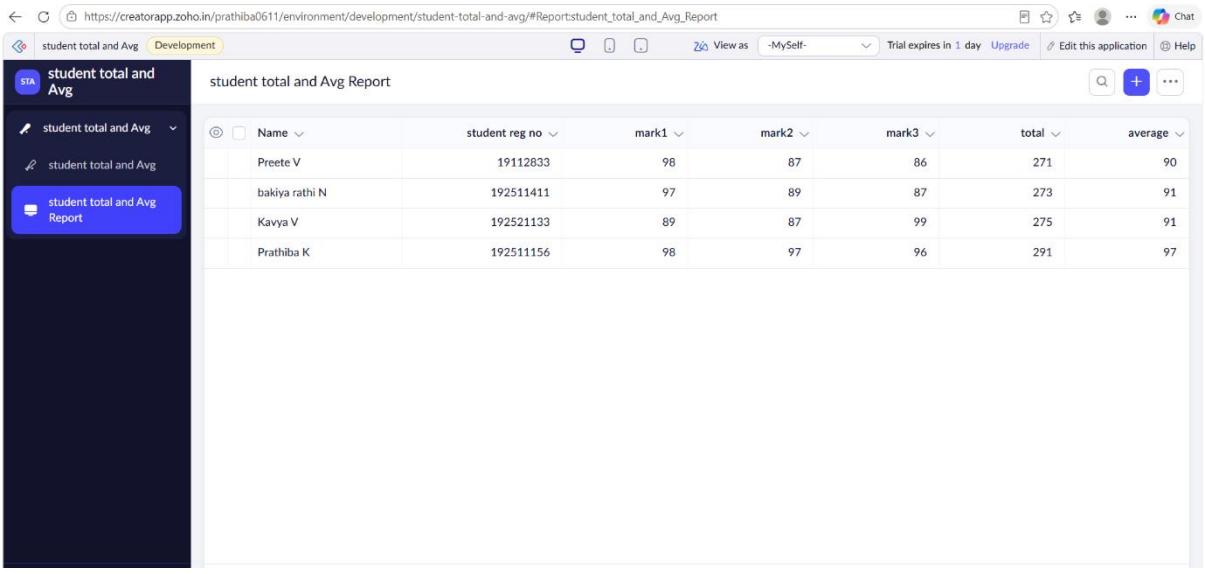

8. Use Zoho Creator's workflow or Deluge script to automate the calculations and assign the overall performance based on the percentage.
9. Save the form and enter records for multiple students. Compare their total marks to determine their ranks.
10. Generate a report to display student details, subject marks, total marks, average, percentage, rank, and overall performance.

IMPLEMENTATION

INPUT

OUTPUT

RESULT

Thus, a cloud-based Mark Sheet Processing System was created using Zoho Creator to store student details, process marks, calculate academic results, and display overall performance through an online report.
