EXPERIMENT 6 Payroll Processing System

AIM

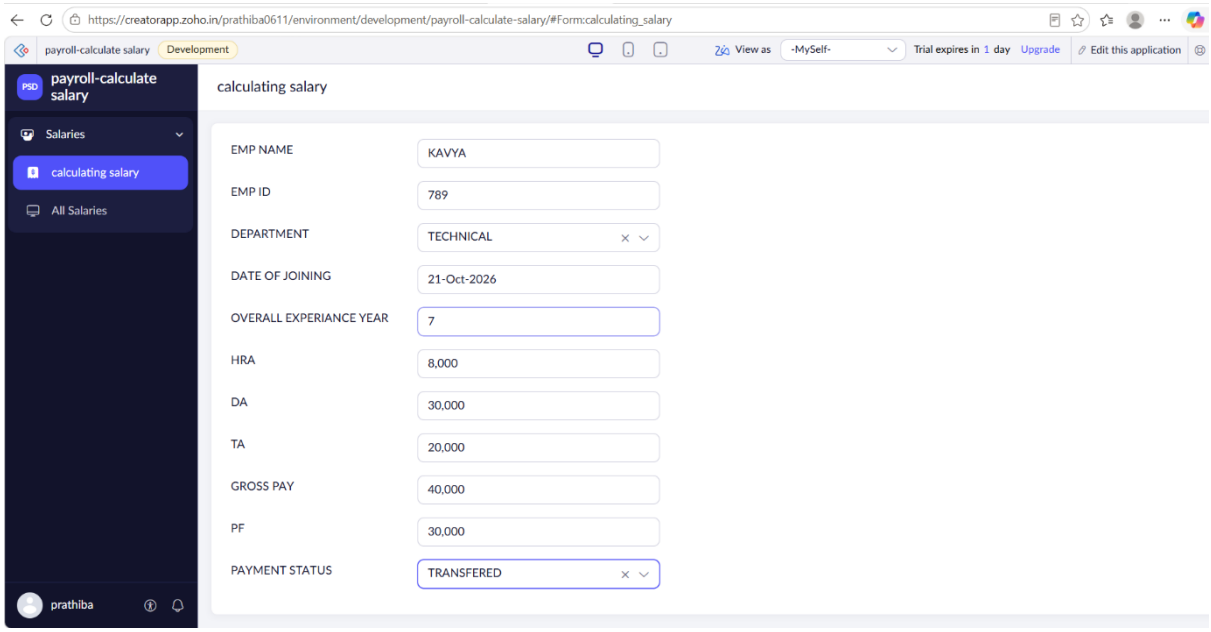

To create a simple cloud-based Payroll Processing System using Zoho Creator to manage employee details and calculate gross pay, net pay, and salary allowances.

PROCEDURE

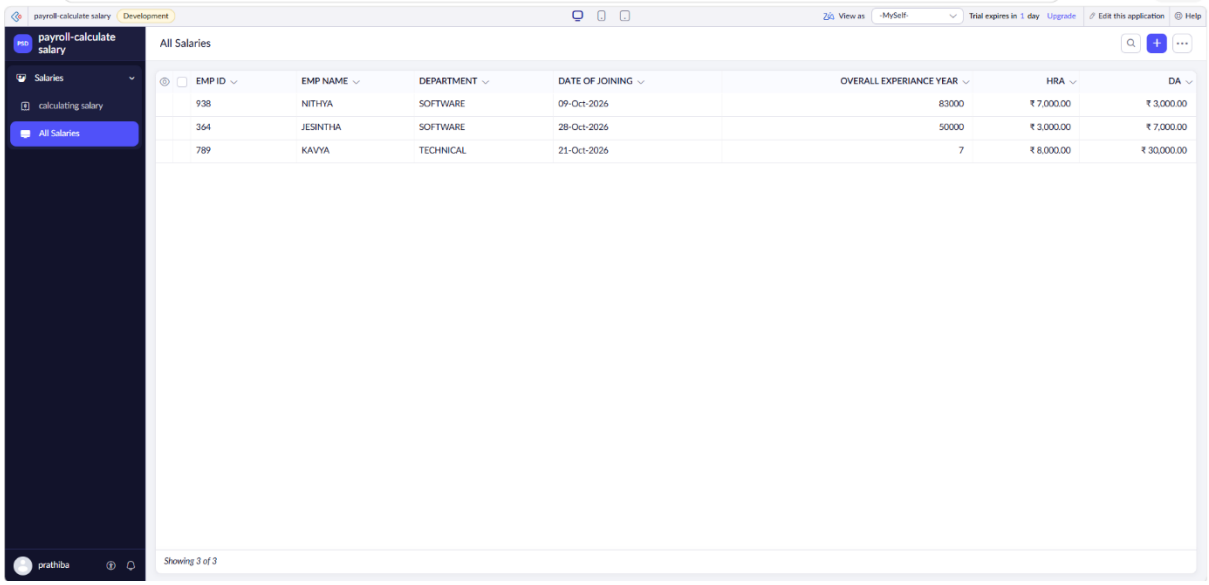

1. Open Zoho Creator and sign in to your account.
2. Create a new application named Payroll Processing System.
3. Create a form for entering employee payroll details.
4. Add the necessary employee details and salary components to the form.
5. Enter employee information, experience, and basic pay.
6. Calculate HRA, DA, TA, gross pay, and net pay using salary calculation formulas.
7. Configure workflows to automate salary calculations.
8. Save the application and enter sample employee records.
9. Generate a report to display employee salary details and payroll results.
10. Test the application to verify the salary calculations.

IMPLEMENTATION

INPUT

OUTPUT

RESULT

Thus, the cloud-based Payroll Processing System was created using Zoho Creator to manage employee payroll details, automate salary calculations, and generate payroll reports, demonstrating the SaaS model.
