EXPERIMENT 7 Students Attendance System

AIM

To create a simple cloud-based Students Attendance System using Zoho Creator to maintain student attendance records, manage OD requests, and calculate attendance percentage and grades.

PROCEDURE

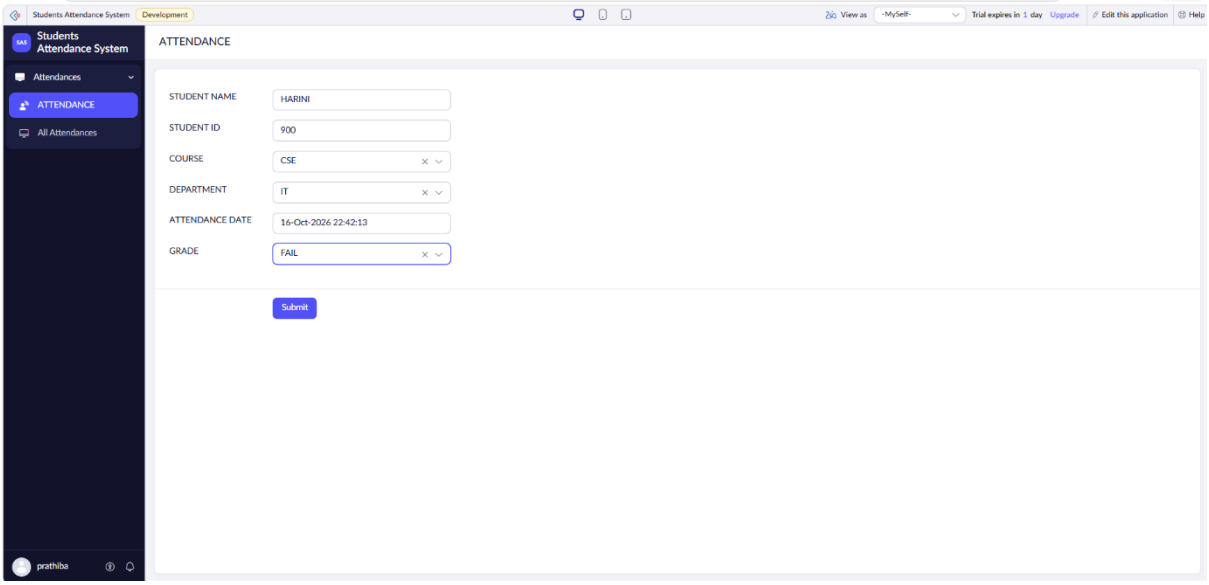

1. Open Zoho Creator and sign in to your account.
2. Create a new application named Students Attendance System.
3. Create a form to record student attendance details.
4. Add the required fields for student information, course details, attendance status, OD requests, and grades.
5. Enter student details and select the attendance status as Present or Absent.
6. Record attendance for each class and maintain the total number of classes conducted and attended.
7. Calculate the attendance percentage using the formula:

Attendance Percentage = (Classes Attended ÷ Total Classes Conducted) × 100

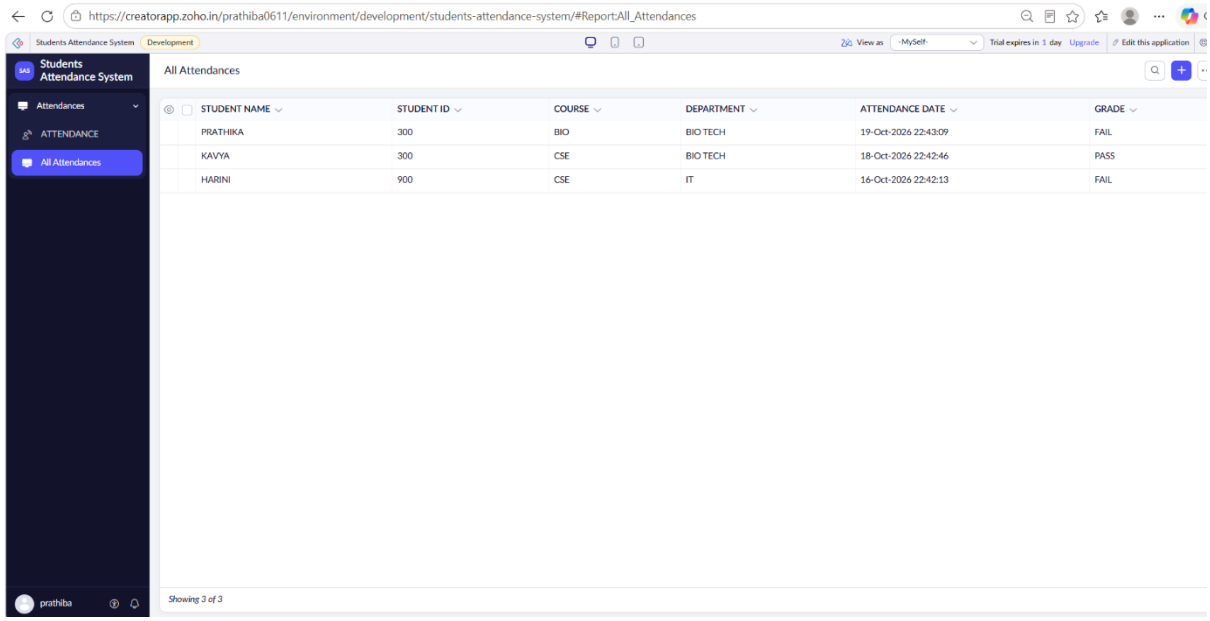

8. Configure workflows to calculate attendance percentages and assign grades automatically.
9. Provide an option to submit and manage On-Duty (OD) requests.
10. Generate reports to view student attendance records, OD requests, attendance percentages, and grades.
11. Test the application by entering sample student records and verifying the results.

IMPLEMENTATION

INPUT

OUTPUT

RESULT

Thus, a cloud-based Students Attendance System was created using Zoho Creator to maintain attendance records, manage OD requests, calculate attendance percentages, and generate student attendance reports, demonstrating the Software as a Service (SaaS) model.
