EXPERIMENT 8 Student Counselling System

AIM

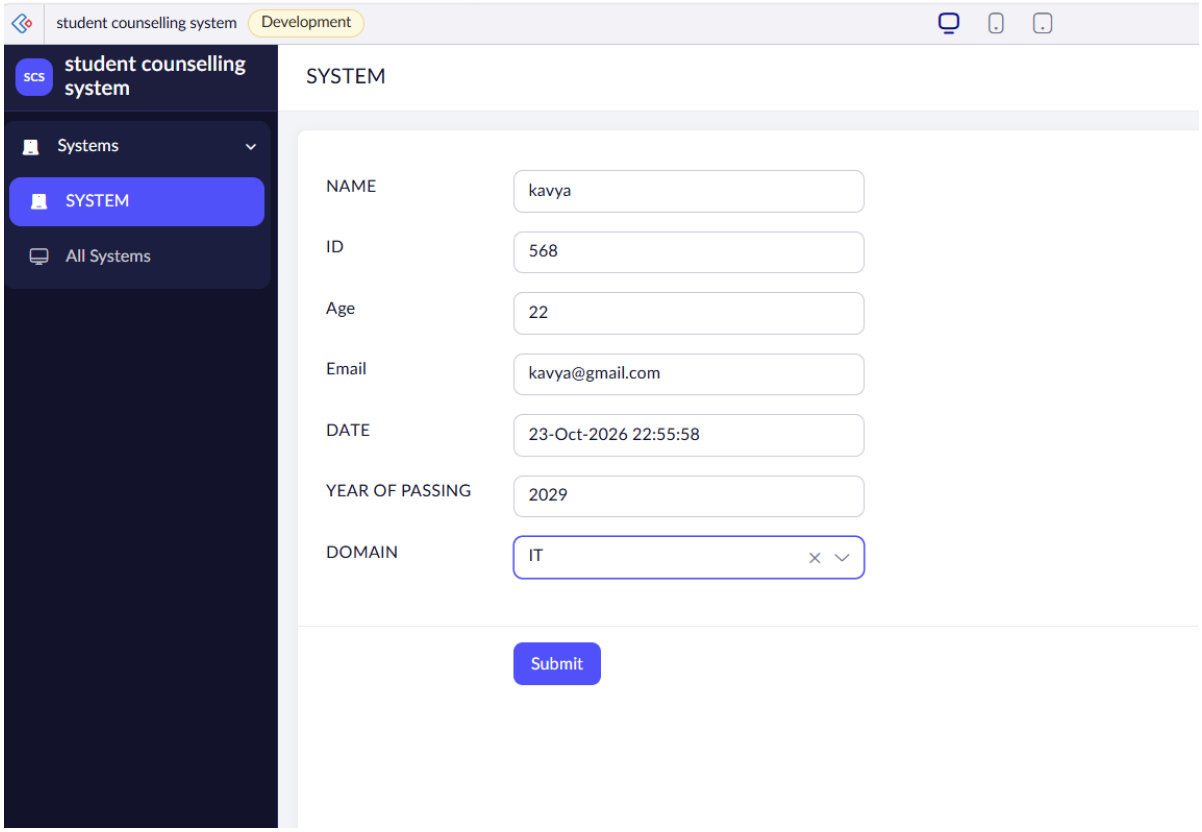

To create a simple cloud-based Student Counselling System using Zoho Creator to store student details, academic information, domain interests, and counselling records.

PROCEDURE

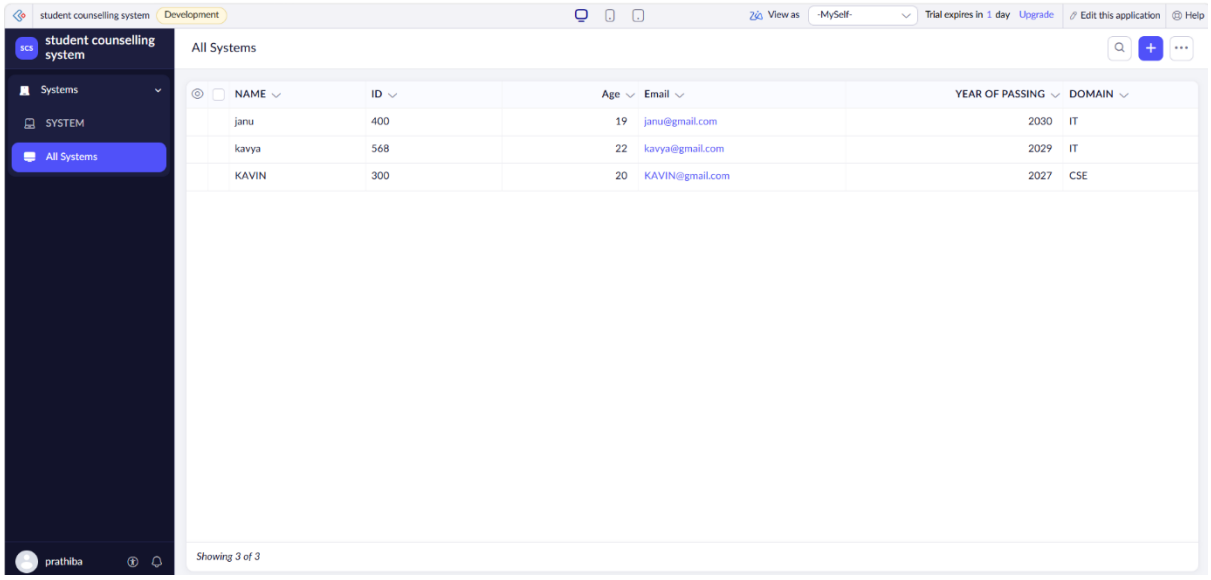

1. Open Zoho Creator and sign in to your account.
2. Create a new application named Student Counselling System.
3. Create a form to collect student details and academic information.
4. Add the required fields for personal details, educational qualifications, percentage of marks, and domain interests.
5. Enter the student information and select the preferred domain of interest.
6. Store the submitted student details securely in the cloud database.
7. Organize student records based on their academic qualifications and domain interests.
8. Create a report to display student details and counselling information.
9. Test the application by entering sample student records and verifying that the details are stored and displayed correctly.

IMPLEMENTATION

INPUT

OUTPUT

RESULT

Thus, a cloud-based Student Counselling System was created using Zoho Creator to maintain student information, academic records, and domain interests, demonstrating the Software as a Service (SaaS) model.
